

AMENDMENT TO THE SPECIFICATION

Please replace the paragraph between line 37 on page 13 and line 6 on page 14 with the following:

Finally Figure 8 shows the tightening of a conical coupling comprising two tube pieces 430 and 431 assembled together by a nut ring 432. In this example of an application for the wrench of the invention, the angle-measuring device 410 is still formed by a tightening socket 412, a spring 413, a tube 411, and an anti-slip ring 414, and it measures differential rotation between the socket and the second wrench 424~~[[414]]~~ used to keep the tube piece 431 in position.
